

POWER BULL

Our Vision

To break down global resource barriers and reshape industry competition.

We bring the industrial DNA and supply chain standards of world-leading giants such as GE and Siemens into growth-oriented enterprises, making exceptional products and services accessible beyond the top corporations, and empowering every partner to become a leader in their field.

Our Users

Next-Gen Mobile Travelers and Families Worldwide

They seek mobile travel experiences in line with their lifestyles embracing the joy of returning to nature through relaxed road trips or off-road adventures.

They demand more from their travel gear—not only stylish aesthetics but also intelligent¹ effortless usability.

Our Concepts

Minimalist Design

Achieve better results with simple designs while staying ahead of future trends.

Seamless Experience

Drive a positive product experience through unique designs¹ offering reliable¹ intuitive¹ and creative car travel gear.

Future-Ready

Provide upgraded user experiences on long road trips or family outings¹ considering not only individual needs but also those of family members¹ partners¹ and pets. Create innovative¹ durable¹ and eco-friendly products for sustainable development.

Safety First

We never compromise on safety. From the very beginning¹ quality and safety are built into the design¹ with science at its core.

Nomadix Pro Roof Box Series

Pack Smart Travel Easy

Industry-Leading Functional Aesthetics

In line with modern EV design¹ Nomadix Pro Roof Boxes boast simplified aesthetics and streamlined curves. Meticulously following aerodynamic principles¹ it achieves quieter rides through smart noise control while delivering exceptionally reduced drag.

Minimalist Aesthetics

Lower Drag within the Industry

Full-width Tail Light ("E" series)

Seamless Smart Unlocking

Forget traditional mechanical keys. No more losing or forgetting them. The innovative fingerprint unlocking system ensures faster and safer access than ever before!

Fingerprint Unlock
High Precision Recognition

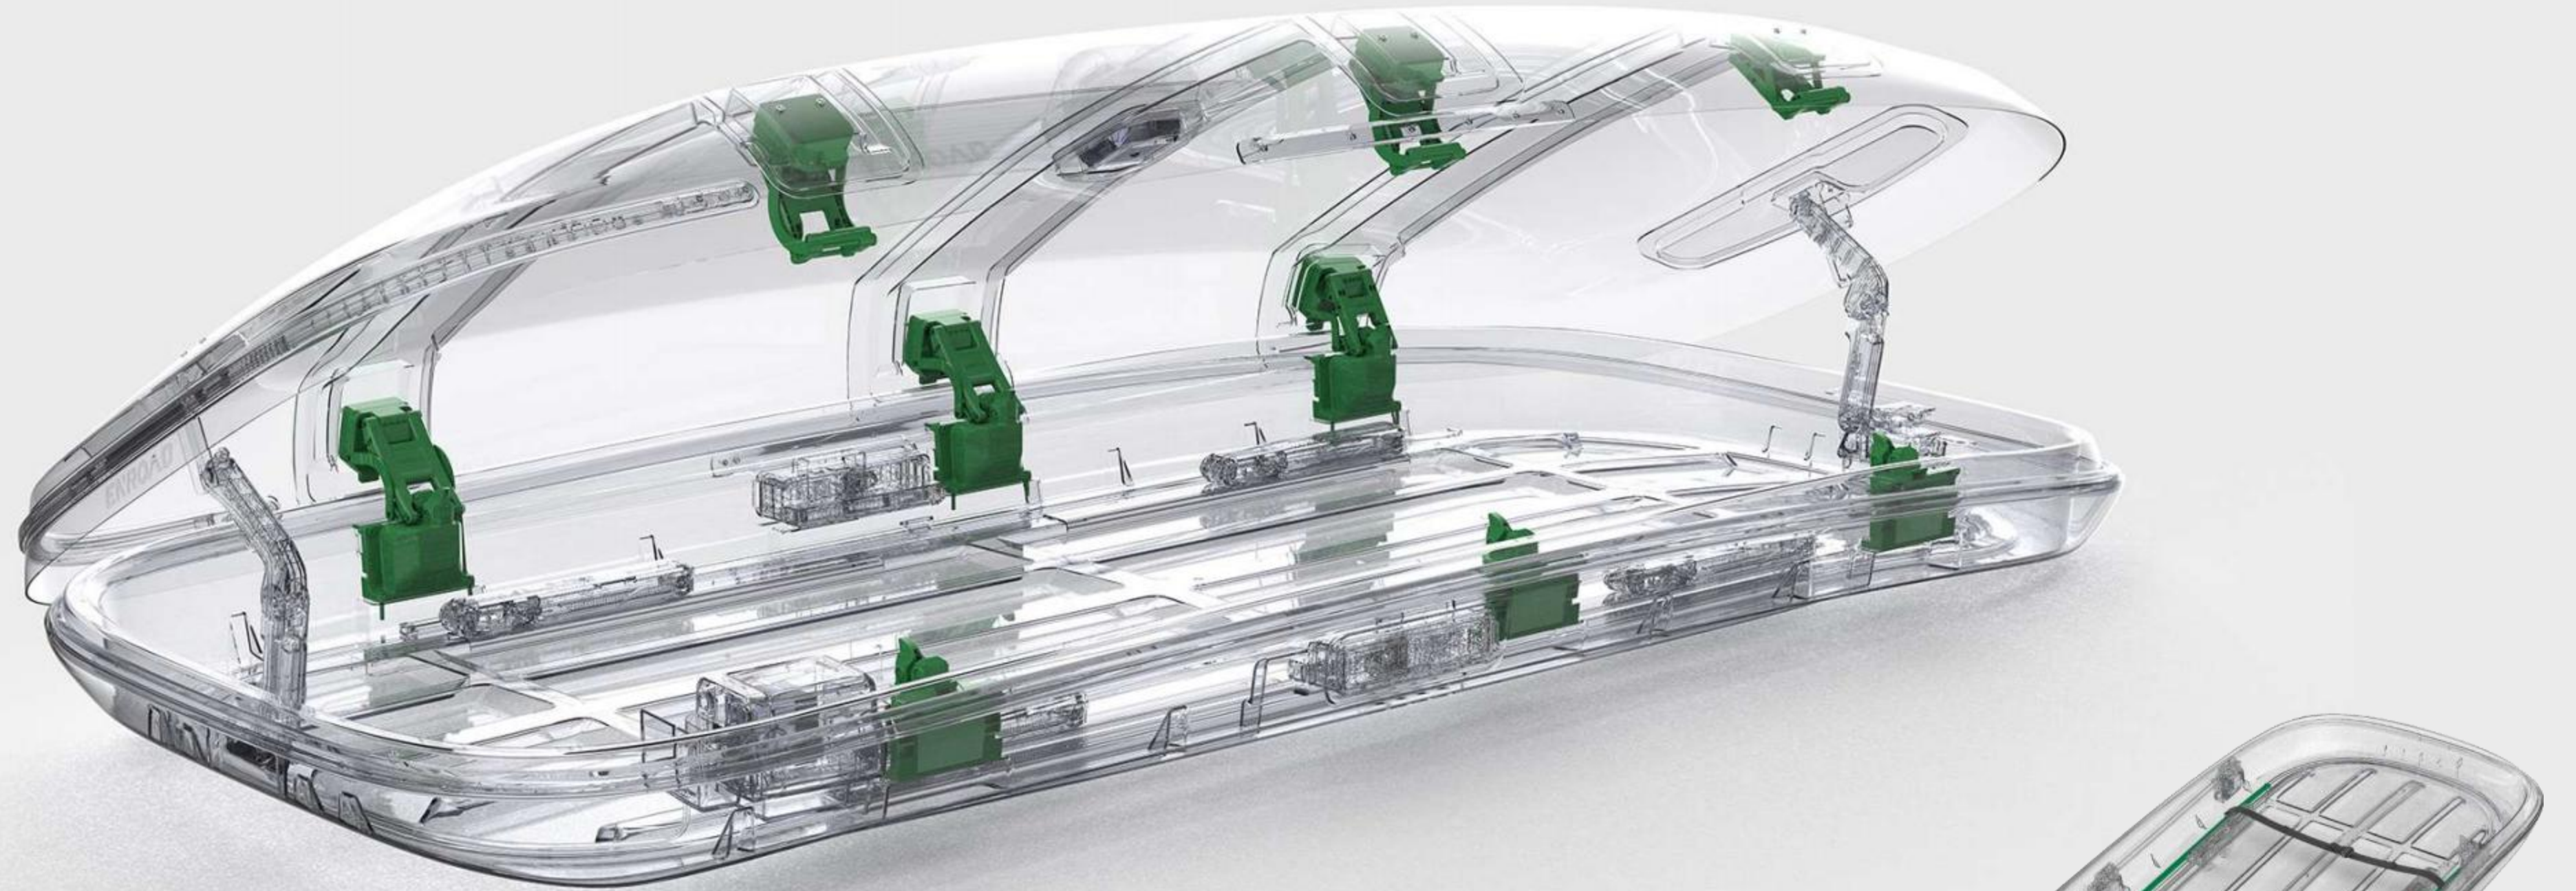

Emergency Backup

Protective Cover

User-Centered Innovation for an Effortless Experience

Innovative Four-Bar Hinges™ keep the lids aligned when closed, truly achieving a flush-fit design. The double-sided opening, supported by arms, allows easy access from either side.

ClickHold™ System

We've replaced the traditional knob with our ClickHold™ fast installation system, a sleek one-way rack and cam lever, reducing bulk and maximizing internal storage space.

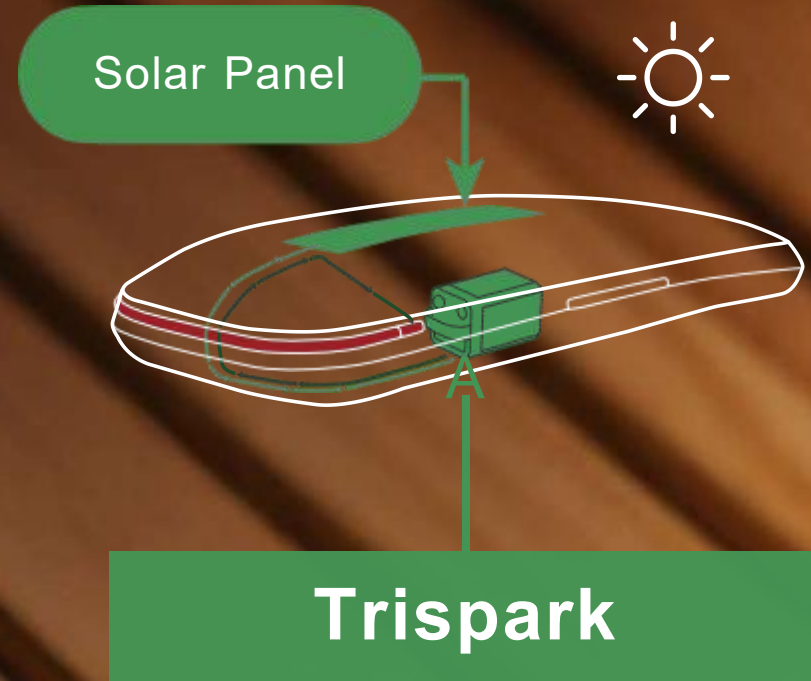

RailTie™ System

Two aluminum alloy slide rails and six zinc alloy buckles enable quick adjustments. The strap locks itself when tightened, and cross straps secure items during sharp turns or braking.

All-Day Power with Green Technology

The 30W solar panel on the top of E-series Roof Boxes converts solar energy into electricity¹ which is stored in the Trispark and can fulfill all-day energy needs.

The Trispark can be used as a power bank or a camping lamp (with a SOS mode)¹ in addition to powering the full-width tail light.

24,000mAh
Capacity

18W
Fast charge

3.5 times
Fully charged for
iPhone 16

3
Lighting modes

6lm-500lm

12~240h
Battery life

Comprehensive Structural Safety Design

5
Bow-shaped reinforcing ribs

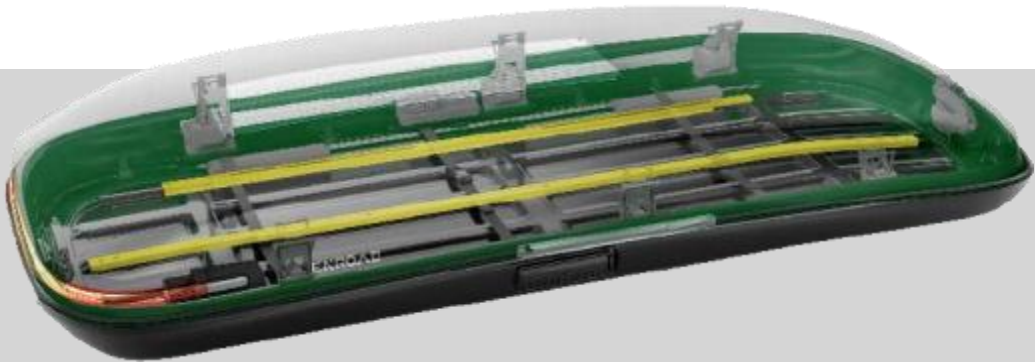

2
U-shaped steel plates

1
Lengthened square pipe

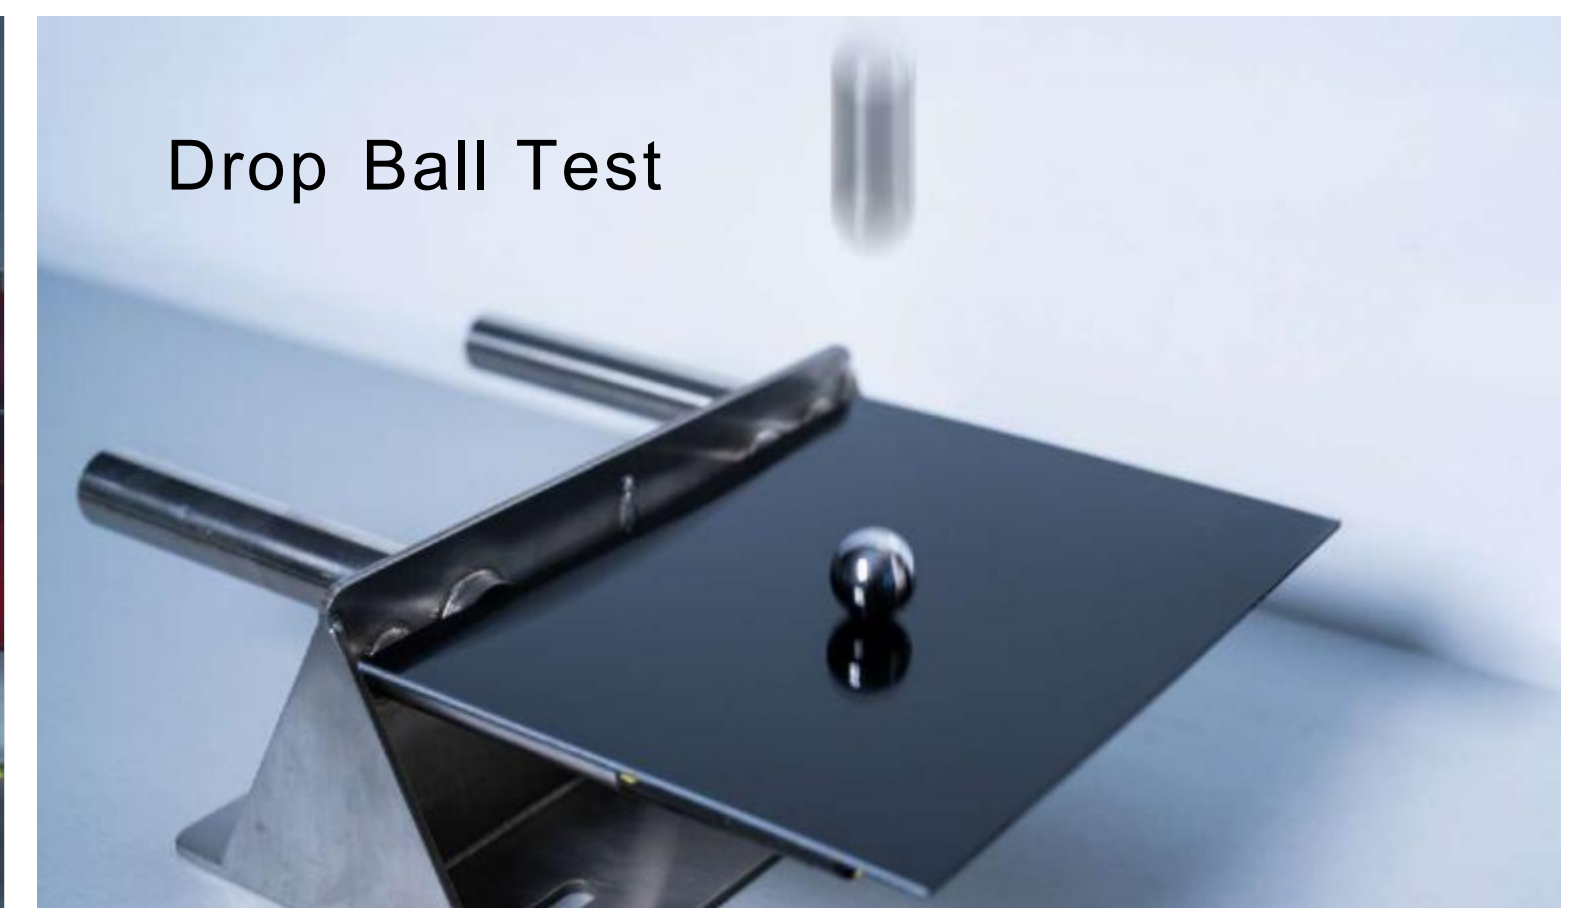

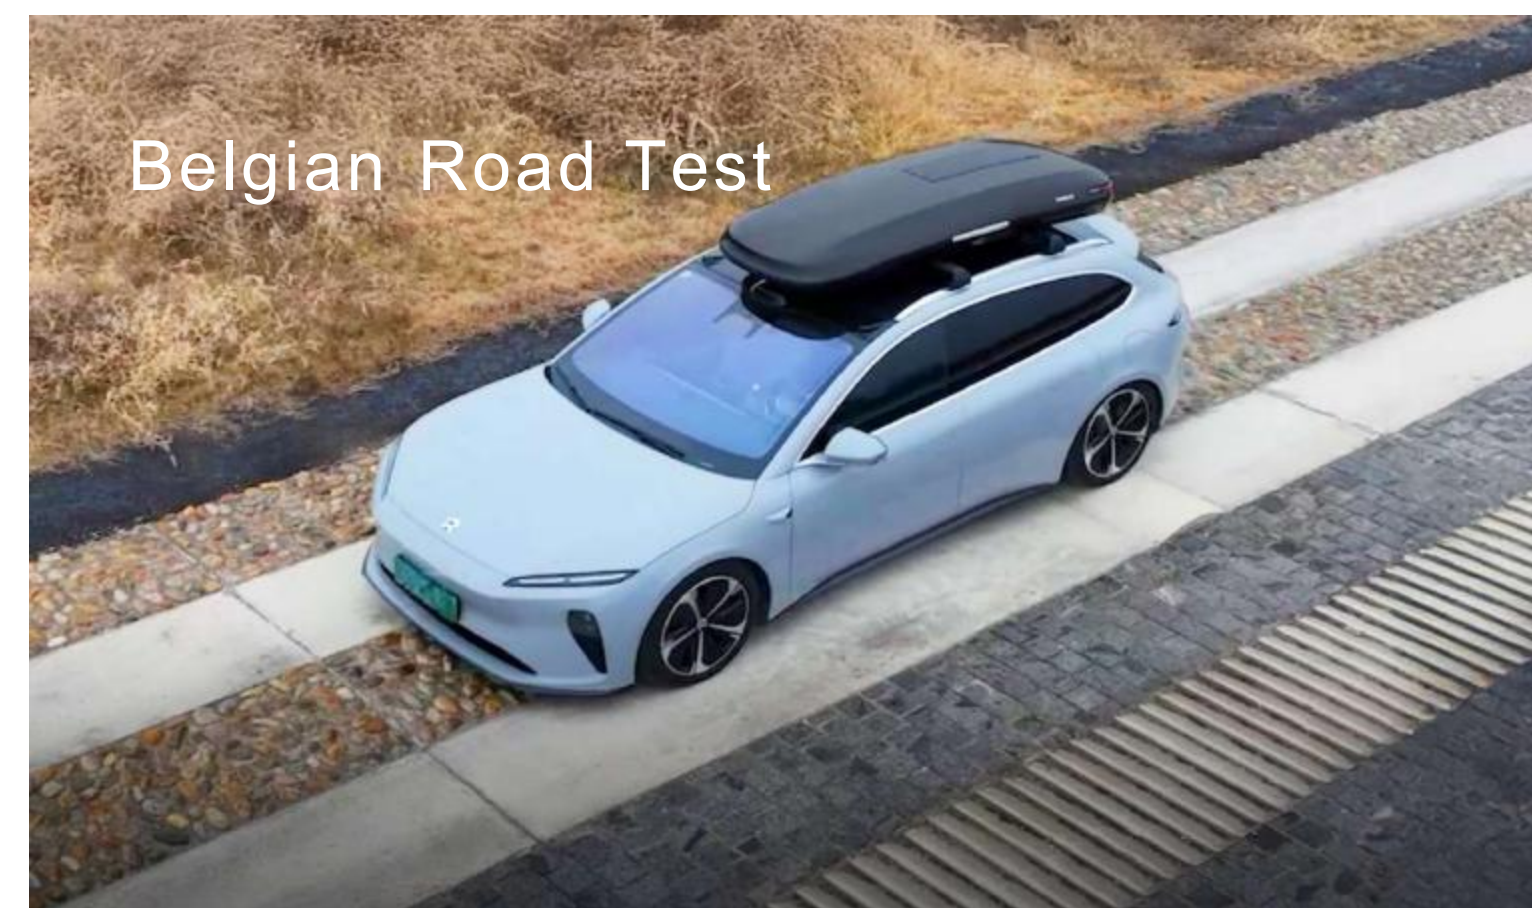

Front-located Secondary Lock
Effectively prevents the top lid from lifting
at high speeds.

360° hollow double-shell
reinforced structure

Industry-Leading Testing Standards with Comprehensive Reliability Tests

After undergoing 24 rigorous simulation tests such as emergency stops, sudden lane changes, bumpy roads, harsh usage conditions, extremely hot/cold weather, prolonged vibrations, and frequent openings and closings, the results clearly show that the Enroad Roof Box can easily, reliably handle any challenge it faces!

Savor Comfort in the Details

With a motion-sensor light that detects both light and movement¹ it ensures easy access to your items in the dark. Washable felt pads fit the box's contours and easy to clean¹ securing items on rough terrain.

What We Pursue

Incorporating minimalism and intelligence into every product design, our brand seamlessly aligns with the aesthetics of modern automotive artistry, offering innovative, reliable, and creative travel gear for the contemporary driver.

Beyond functionality, we prioritize the importance of our harmonious co-existence with the environment.

By utilizing green technology, superior durability standards, and eco-friendly materials, we are firmly committed to the principles of sustainable development.

Easy to Go Easy to Feel. This is an invitation, an anticipation for life, our confidence in the product.
